Career Objective

Detail-oriented Bachelor of Computer Applications (BCA) student at Jagannath International Management School (JIMS) with hands-on experience in frontend web development, UI/UX implementation, and system design. Experienced in building responsive, user-focused web applications using modern technologies and collaborative development practices. Actively involved in national-level hackathons and technical projects, with a strong interest in problem-solving, product development, and delivering scalable, real-world software solutions.

Education

Jagannath International Management School (JIMS), Delhi **2024 – Present**

Bachelor of Computer Applications (BCA)

SLS DAV Public School, Mausam Vihar, Delhi **2021 – 2024**

Higher Secondary Education

Experience

Manager – IT Club **2024 – Present**

Jagannath International Management School (JIMS), Delhi

- Managed technical planning, execution, and coordination of IT Club initiatives and activities.
- Led the development and maintenance of two institutional websites for the IT Club and college events, ensuring reliability and scalability.
- Collaborated with cross-functional teams of designers and developers to deliver responsive, performance-optimized web solutions.
- Collaborated with the SEO team to enhance digital visibility and search performance of institutional platforms.
- Coordinated with faculty members and student teams to align technical projects with academic and administrative objectives.

Projects

Microsoft Imagine Cup Project *React 18, TypeScript, Vite, Tailwind CSS, React Router v7, Lucide React*

- Developed a modern, scalable frontend architecture using React and TypeScript with a component-based design approach.
- Implemented responsive and accessible UI components using Tailwind CSS, ensuring cross-device compatibility.
- Followed clean code and maintainability practices to improve performance and long-term scalability.
- Worked on **SENTINEL – Early Warning System for Mental Health**, focusing on frontend implementation and system design.
- Built real-time mood tracking dashboards with animated data visualizations and user-centric layouts.
- Designed a four-tier risk assessment interface with privacy-first workflows and informed consent handling.

IIC Regional Meet – Rural Governance Platform *React, Tailwind CSS, Mapbox GL JS*

- Developed a role-based, multi-dashboard web platform for rural governance and planning use cases.
- Integrated GIS-based planning tools using Mapbox GL JS for spatial visualization and analysis.
- Enabled application tracking, budget visualization, and gamified planner workflows to improve usability.

Improve My City *React 18, TypeScript, Tailwind CSS, Express.js, Node.js, Interactive Maps*

- Developed a full-stack web application for citizens to report municipal issues with real-time status tracking.
- Implemented role-based dashboards for Citizens, Admins, and Workers, enhancing workflow efficiency.
- Integrated smart duplicate issue detection and interactive map interface for precise reporting.
- Supported image/video uploads and analytics to assist city administrators in decision-making.

Waste Segregation Helper – GDG *React, TypeScript, Tailwind CSS, Google Gemini AI, Recharts*

- Built an AI-powered web app to classify waste items into Biodegradable, Recyclable, and other categories.
- Enabled users to upload images and receive accurate disposal recommendations with environmental impact tracking.
- Developed responsive dashboards with interactive charts to visualize user history and insights.

Argenté – E-Commerce Platform *React 18, Vite, React Router DOM, CSS3, Context API*

- Designed a premium fashion e-commerce platform with product catalog, filters, cart, wishlist, and checkout flow.
- Enhanced UI/UX with animations, responsive layouts, and seamless multi-device navigation.
- Implemented state management using Context API for persistent cart and user interactions.

Technical Skills

Languages: Python, Java, C
Web Technologies: HTML, CSS, JavaScript, React.js, Tailwind CSS
Databases: MySQL
Tools: Git, GitHub, VS Code, Figma

Hackathons

Zenigma Hackathon – E-Summit, IIT Roorkee **Feb 2024**
Finalist (Top Teams Nationwide) *Event Link*

- Selected as a finalist in a 36-hour national-level design and product ideation hackathon.
- Collaborated in a team to develop solution concepts, rapid prototypes, and structured pitch presentations under tight deadlines.

Smart India Hackathon (SIH) **2024 – 2025**
Participant

- Participated in SIH 2024 and SIH 2025, contributing to solution ideation and technical planning for national problem statements.

HackVerse – GDG JIMS Vasant Kunj (with Enigma IT Club) **Jan 2025**
3rd Place Winner — Cash Prize Rs 1,000 *Event Link*

- Developed an AI-powered waste segregation mobile application to address improper waste disposal at the source.
- Implemented camera-based waste scanning with automated classification into biodegradable, recyclable, and non-recyclable categories.
- Used Google Gemini AI for image recognition, Firebase for data storage, and Google Cloud Platform (GCP) for backend scalability.
- Designed a user-friendly interface providing real-time disposal guidance, sustainability tips, and impact tracking.
- Awarded 3rd place for innovation, real-world applicability, and technical execution.

Certifications

Artificial Intelligence Fundamentals — IBM SkillsBuild *Credential Link*

HackVerse GDG JIMS Vasant Kunj – (3rd Place) *Event Link*

Zenigma UI/UX Hackathon — Participation Certificate *Certificate Link*

Smart India Hackathon 2024 — Participant

Smart India Hackathon 2025 — Participant

Soft Skills

- Team Collaboration and Cross-Functional Communication
- Analytical Thinking and Problem Solving
- Adaptability in Fast-Paced Environments
- Time Management and Task Prioritization
- Clear Verbal and Written Communication
- Attention to Detail and Quality Focus
