Career Objective

Computer Applications student at JIMS, Delhi, with demonstrated experience in building and deploying web applications, leading technical initiatives, and competing at national-level hackathons. Combines strong problem-solving ability with a consistent record of execution — from institutional platforms serving real users to product ideation under competitive constraints. Looking to contribute to a high-performing team where technical depth and delivery matter.

Education

Jagannath International Management School (JIMS), Vasant Kunj , Delhi **2024 – Present**
Bachelor of Computer Applications (BCA)

SLS DAV Public School, Mausam Vihar, Delhi **2021 – 2024**
Higher Secondary Education

Experience

Manager – IT Club **2024 – Present**
Jagannath International Management School (JIMS), Vasant Kunj , Delhi

- Lead technical planning and execution of IT Club initiatives, including development projects, workshops, and technical events.
- Develop and maintain institutional websites for IT Club activities and college events, ensuring responsive design and reliable performance.
- Led the development of the official event platform **cynet.jimsd.org** used to manage registrations and showcase the college's flagship technical event.
- Collaborate with designers, developers, and SEO teams to deliver optimized web solutions and improve digital visibility of institutional platforms.
- Mentor junior members on frontend development, modern web technologies, and collaborative software development practices.

Projects

Improve My City  *React, TypeScript, Tailwind CSS, Node.js, Express.js*

- Built a **civic issue reporting platform** enabling citizens to report municipal problems with **real-time status tracking**.
- Designed **role-based dashboards** for Citizens, Admins, and Workers to streamline issue resolution workflows.
- Integrated **map-based reporting**, duplicate issue detection, and media uploads for accurate documentation.

SENTINEL — Early Warning System for Mental Health  *React, TypeScript, Vite, Tailwind CSS*

- Developed the frontend for a **mental health early-warning system** built for the Microsoft Imagine Cup competition.
- Built responsive **real-time mood tracking dashboards** with animated data visualizations.
- Designed a **four-tier risk assessment interface** with privacy-first workflows and informed consent handling.

Argenté — E-Commerce Platform  *React, Vite, CSS3, Context API*

- Built a **responsive e-commerce application** featuring product catalog, filtering, cart, wishlist, and checkout flow.
- Implemented **global state management** using Context API for seamless cart and user interaction handling.
- Designed **engaging UI and responsive layouts** to enhance user experience across devices.

AnyFeast – Onboarding Experience Redesign  *React 19, TypeScript, Tailwind CSS, Framer Motion*

- Redesigned the onboarding flow into an intuitive **11-step user journey** to capture health goals and dietary preferences.
- Built **responsive and reusable UI components** with smooth animations using Framer Motion.
- Implemented **state management and progress persistence** using TypeScript and localStorage.

ITZFIZZ — Scroll-Driven Hero Animation  *React, GSAP, Tailwind CSS, JavaScript, Vite*

- Developed a **high-performance scroll-driven hero section** using GSAP and ScrollTrigger.
- Implemented **parallax effects, animated statistics, and text reveals** synchronized with scroll progression.
- Optimized animations using **transform-based rendering** for smooth performance across devices.

Technical Skills

Languages: Python, Java
Web Technologies: HTML, CSS, JavaScript, TypeScript, React.js, Tailwind CSS , GSAP, Node.js, Express.js
Databases: MySQL
Tools: Git, GitHub, VS Code, Figma

Hackathons

Google Developer Groups (GDG) Hackverse – JIMS, Delhi **Jan 2026**
Winner *Event Link*

- Secured third place by developing an innovative technology-driven solution evaluated on problem relevance, execution, and impact.
- Demonstrated strong teamwork, rapid development skills, and effective technical presentation to judges and mentors.

PU Hackathon – Parul University **Jan 2026**
Finalist *Event Link*

- Selected as a finalist among multiple teams for proposing and building a practical software solution within a competitive environment.
- Worked under tight deadlines, focusing on solution design, implementation, and final pitching.

Zenigma Hackathon – E-Summit, IIT Roorkee **Feb 2024**
Finalist (Top Teams Nationwide) *Event Link*

- Competed as a finalist team in a 36-hour design and product ideation hackathon focused on technology-driven solutions.
- Collaborated on rapid prototyping, feature prioritization, and pitch preparation under strict time constraints.
